

The ultimate weigher is now open for cleaning

How does Ishida improve the best IP69K rated waterproof weigher?

By opening its framework and moving all computer components into a compact waterproof cabinet. Now all product contact parts are fully exposed for cleaning and quick removal without using tools. And you have more flexibility in support platform design and integration with other packaging machinery.

For details on Ishida's Open Frame weigher, contact Heat and Control today

Ishida Model **CCW-RV-214W** Open Frame

- Unrestricted access for cleaning and maintenance
- External or remote electrical component cabinet reduces risk of water damage
- Sloped self-draining support frame and weigher dispersion feeder cover
- IP69K, IP67 and IP66+ washdown ratings
- New water-resistant infeed camera option
- New sanitary inlet chute
- Sanitary timing hopper option with sloped drive enclosure
- Open Frame design available on all RV 14-head waterproof weighers with 2, 3, 5 and 7 liter size hoppers

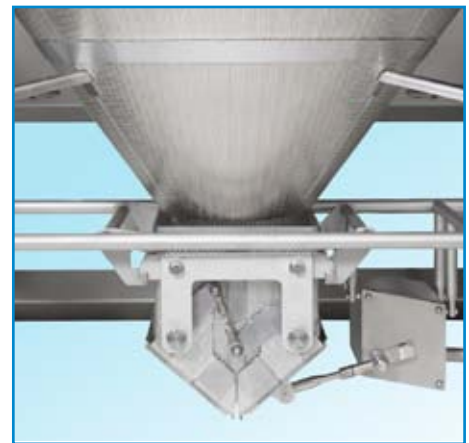

Ishida **RV Open Frame** weighers are built for simple sanitation.

Electrical components are safely contained in an external waterproof cabinet. Cabinet is also available for remote location up to 65 feet away from the weigher

Positioned outside the product area, the optional infeed camera is height-adjustable and designed to prevent moisture intrusion.

Sloped timing hopper drive (optional), support frame, and radial feeder cover are self-draining and fully accessible to prevent unsanitary moisture traps.

For a demonstration, applications assistance, installation, service, parts and training, contact Heat and Control today.
